## EXPERIENCE

**Software Development Intern, Amazon — Alexa Smart Home** Jul 2026 – Present

- Built **recommendation-serving backend logic** for a **high-TPS** service powering **Alexa Smart Home** devices.
- Developed the **recordInteraction** feature to capture and process user interactions with recommended content.
- Worked with **Kafka** and **AWS SNS/SQS** event and subscription flows at high TPS using **Java (Spring Boot)**.

**Full Stack Intern, Inbotiq** 2024 – Present

- Built backend services for a **production AI voice bot platform**, integrating **STT, TTS, and LLM pipelines** with webhook-based call lifecycle handling.
- Improved reliability with **VAD (Silero)** and session state management using **Python, FastAPI, PostgreSQL**.

## PROJECTS

**LocalArena – Distributed Multiplayer Game Backend** Oct 2026
GitHub

- Built a **server-authoritative multiplayer backend in Go** (20 Hz fixed tick, WebSockets), sustaining **1,000 bots across 50 matches at tick p99 0.76 ms**.
- **Event-driven design** with **Kafka, Protobuf, outbox + Debezium CDC, and Kafka Streams**; idempotency keys gave **zero duplicate rewards** across 1.45M replayed events.
- Deployed on **Kubernetes (Helm, Argo CD, OpenTofu)** behind **Envoy** with **PostgreSQL** and **Valkey**; canary, rollback, and failover drills had **0 failed requests**.

**TTL-Based Ephemeral Chat & Voice and Video Room Platform** 2026 Jan– Present
GitHub | Live Demo | Demonstration Post

- Real-time ephemeral chat and voice rooms with **auto-expiring data**, built in **Go (gorilla/websocket)** with a goroutine/channel-based room architecture.
- **Redis as the sole datastore** for messages, presence, and TTL enforcement; **TypeScript + Next.js** frontend.
- Added **peer-to-peer WebRTC voice & video** (full mesh, up to 8 users), with the Go server relaying only **SDP/ICE signaling** over WebSockets.

**SolanaPay – Stripe-like Payment Infrastructure for Solana** Oct- Dec 2025
GitHub | Live Demo | Demonstration Post

- Hosted checkout letting Web2 apps accept **Solana payments**, with **on-chain transaction verification**.
- Backend in **TypeScript, Express, Prisma (PostgreSQL), Redis, Socket.io** with real-time updates, webhooks, and **idempotent APIs**.

## TECHNICAL SKILLS

**Languages:** Java, Go, TypeScript, JavaScript, Python, C++, C, Rust, Solidity
**Backend & Real-Time:** Go (net/http, WebSockets), Spring Boot, Node.js, Express, FastAPI, Socket.io, REST APIs
**Messaging & Streaming:** Kafka, Kafka Streams, AWS SNS/SQS
**Frontend:** React, Next.js
**Datastores:** PostgreSQL, Redis, MongoDB
**Blockchain:** Solana & EVM Smart Contracts, Web3.js, Ethers.js
**Infra & Tooling:** Git, Docker, Kubernetes, Helm, CI/CD, Vercel

## EDUCATION

**Indian Institute of Information Technology, Kota** 2023 – 2027
B.Tech in Computer Science and Engineering

## ROLES AND RESPONSIBILITY

**Coordinator & Web3 Lead, Codebase Club — IIIT Kota** 2023 – Present

- Led **blockchain community projects**, shipping dApps and smart contracts with **Solidity, Web3.js, Ethers.js**.
- Mentored **30+ developers** on smart contract deployment, Git workflows, and collaborative engineering.
- Organized weekly hands-on sessions (15+ members) focused on **full-stack + blockchain integration**.
